BNT	Ratchet Strap	2	<input type="checkbox"/>

BOAT BAR INSTALLATION INSTRUCTIONS

SEC 1

Raise the left and right wings of the Trailer and lock them in place (Refer to original utility instructions for more information on locking the wings of the Trailer upright). Set the ends of the Boat Bar (**BOW**) over the wings of the Trailer at a distance from the Front Gate that accommodates the length of your watercraft.

SEC 2

Attach one end of the Ratchet Strap (**BNT**) to the pin on the Boat Bar as shown. Attach the other end of the Ratchet Strap to the wing of the Trailer and tighten securely. Repeat this step for the other end of the Boat Bar. Secure your watercraft to the Trailer according to the instructions provided with your watercraft. Verify Ratchet Straps are secure before travel.
